As an ordinary everyday object you can carry the umbrella at any time and everywhere. With this umbrella you can also pass through security checks at the airport as usual. It was carried as hand luggage by panelists repeatedly on European flights without problems. It is absolutely harmless and your faithful companion on all occasions. The rod of the umbrella is made of a special, extremely resistant glass fiber composite material and the ribs are made of fiber glass. The umbrella is practically unbreakable, no matter how hard you hit. During development, it was subjected to rigorous testing. It is a fully functional, elegant umbrella with automatic opening mechanism. The rod is virtually unbreakable, no matter the stress to which it is subjected. It weighs just 550 grams with a length of 90 cm. The umbrella can bear the weight of a person of up to 70 kg. The umbrella can be carried anywhere legally (even in aircrafts and in office buildings). It contains no unusual ingredients and the only metal is the stainless steel tip. The umbrella also comes with a protective case and practical hand strap. Opened diameter: 107 cm. Cover: 100 % Nylon
